

JACKOBOARD® Sealing Tape

- For sealing board joints in wet areas

Product Description

The **JACKOBOARD®** sealing tape and self-adhesive sealing tape is available in straight rolls, internal and external corners.

Product Properties

The **JACKOBOARD®** sealing tape is made from a thermoplastic elastomer – colour grey.

Surface preparation requirements

JACKOBOARD® Plano Construction board must be clean and free on any contaminates. Wash down joint face with clean water and sponge and leave to dry for both self-adhesive and non-adhesive options.

Product applications

JACKOBOARD® Sealing tape is used to water seal **JACKOBOARD®** construction board joints in wet areas.

- Ensure the joint is suitably prepared
- Non-adhesive option – bed tape within **JACKOBOARD®** waterproof sealing liquid membrane
- Self-adhesive option – The butyl adhesive is covered by 2 halves of removable tape backing to aid internal corner applications. Cover front face of sealing tape with **JACKOBOARD®** waterproof sealing membrane for complete sealing process.
- Once dried, tiling can commence.

Description	Dimensions and metrics
Non self-adhesive	10m and 50m rolls – width 120mm
Self-adhesive	20m roll – width 80mm
Internal and external corner	Width 70mm per leg

Sustainability

Our factories are managed to the highest standards of environmental compliance and our products are also independently tested to ensure they meet the most rigorous European standards. In addition **JACKON** products are designed to reduce the energy requirements of any building throughout its lifetime and therefore contribute significantly to a reduction in global warming.
